# RECENT METHODS IN THE DIAGNOSIS AND TREATMENT OF SYPHILIS

BY

CARL H. BROWNING, M.D., D.P.H.

AND

IVY MACKENZIE, M.A., B.Sc., M.D.

WITH AN INTRODUCTION BY

ROBERT MUIR, M.A., M.D., F.R.S.

PART I.—DIAGNOSIS

REVISED BY C. H. BROWNING

PART II.—TREATMENT

REVISED BY I. MACKENZIE

WITH CHAPTERS BY J. CRUICKSHANK AND T. TANIGUCHI

SECOND EDITION

ENTIRELY RE-WITTEN

*Medium 8vo.*

*Illustrated.*

*42/- net.*

"Every clinical and laboratory worker in syphilis should buy this work, read it carefully, and then keep it for reference."—*The Lancet.*

"It would be impossible to exaggerate the importance of such a volume as this in the study and treatment of the most widely spread and serious of our social diseases."—*Glasgow Herald.*

## MODERN DIAGNOSIS AND TREATMENT OF SYPHILIS, CHANCROID & GONORRHOEA

BY

L. W. HARRISON

D.S.O., M.B., Ch.B., M.R.C.P.E., Brevet-Col. R.A.M.C. and K.H.P. (Ret.)

*Director of the Venereal Diseases Department, St. Thomas's Hospital; University of London Lecturer on Venereal Diseases, St. Thomas's Hospital Medical School; Special Medical Officer for Venereal Diseases, Ministry of Health.*

*Demy 8vo.*

*Illustrated.*

*10/6 net.*

"... gives a lucid and concise account of syphilis, chancroid and gonorrhoea in all their manifestations, and with the sections on diagnosis and treatment no fault can be found. ... To the busy practitioner who cannot overtake the modern literature it should be very useful."  
—*The Lancet.*

# The Advantages of DETOXICATED VACCINE in the treatment of GONORRHOEA

Gonorrhoeal infection is chiefly confined to the superficial mucous membranes, which are poor producers of antibodies. But by giving injections of Detoxicated Gonococcal Vaccine the manufacture of antibodies is greatly accelerated, and consequently the duration of the disease is considerably curtailed.

Moreover, cases treated with Detoxicated Gonococcal Vaccine from the beginning are very much less liable to develop complications such as prostatitis, vesiculitis, epididymitis, salpingitis, rheumatism, etc., and the possibilities of a relapse are reduced to a minimum.

These vaccines are prepared (under the personal supervision of the discoverer) in the Pickett-Thomson Research Laboratory, London, and two varieties of detoxicated gonococcal vaccine are available.

## Detoxicated Gonococcal Vaccine (A)

(Telegraphic Code: "Puregon.")

This is a pure gonococcal vaccine prepared from many strains (polyvalent) and is indicated in all *early* cases of gonorrhoea, also in cases of gonococcal arthritis, orchitis or epididymitis, iritis, salpingitis, ovaritis, etc.

## Detoxicated Gonococcal Vaccine plus Secondary Organisms (B)

(Telegraphic Code: "Mixgon.")

This vaccine is composed of equal parts of the vaccine A, and the organisms found as secondary invaders in cases of gonorrhoea of more than three or four weeks' duration and is indicated in old-standing chronic cases.

### Prices of Detoxicated Gonococcal Vaccine A and B.

Phials	1 cc. containing 5,000 or 7,500 mils	-	£	s.	d.
				3	0
"	1 cc. " 10,000 mils and upwards	-		4	0
Bottles	5 cc. " (50,000 mils per cc.)	-	1	0	0
"	10 cc. " " "	-	2	0	0
"	25 cc. " " "	-	5	0	0

*Specially prepared literature dealing with vaccine therapy  
in a wide range of indications will gladly be sent post free.*
